Graphics: nVIDIA GeForce GTX 260, 512 MB or ATI Radeon HD 5670, 512 MB (Does not support Intel Integrated Graphics Cards)

DirectX: Version 9.0c

Network: Broadband Internet connection

Storage: 4 GB available space

English,French,German,Polish,Russian,Simplified Chinese

cities skylines country road radio station. cities skylines country road radio. cities skylines country road radio songs

beautiful abstraction pleasant music confused only difficulty when you rise to the top. I really appreciated this title :

- Wonderful music
- Dev answers to any question in a blink of an eye
- No boring things like food or light management
- Only fun

8 / 10 well deserved. Useful for Long term Pirates as permanent labour and Officer Badges save time/effort over grinding in game currency for monthly badges.

Shame it didnt carry over for the palour badges and gives only a 1 month.

But guess thats there to keep the money coming in from the poker players.

out of the 3 DLC this is th only useful one with other two being more for looking good than being useful.

its a fair amount but if youre planning to play long term its worth it.. tiny tasy town game who i like after my time at portia and i hope dev can finish this game asap

[w-w-w.youtube.com/watch?v=w5yO0wiHQWY](https://www.youtube.com/watch?v=w5yO0wiHQWY). I love caveman \ Dinosaur genre games, in my opinion, there is not enough of them and it is a genre that is way overlooked.

Here comes along Dinocide with some really cool game mechanics, mostly familiar from the NES era.

The game feels like not so much a throwback but more of an homage to the past.

However the game is poorly put together, there is no structure to the overworld map, and this feels clunky, I would have much preferred clear stages such as desert, forest, ice, instead we are given a roulette style level system, I have no idea who thought that was a good idea.

Also, the game is very repetitive, some of the level design feels rushed and the enemies seem as though they were taken from previous projects the team had worked on, for a game called Dinocide there are very thew dinosaurs, which is a shame, instead we have Mexican skeletons and zombie pig-men !!!

There are some good secrets hidden away, and the boss fights are inventive, I kind of wish the team had spent more time on creating more bosses and actual dinosaur enemies than trying to pad out the game with convoluted levels.

Dinocide does have some charm, it's hard to find but it does exist within the game, surprisingly with everything said the game is fun and does give the player some challenges, even if some of them seem unfair at times.

I believe this is a game aimed at little children, who have very short attention spans. Dinocide is a bad game, it is not a good game, but it is fun and very random.

I am giving it a thumbs up because I do believe people should play this if only to learn what not to do while developing a game, and how to avoid the trappings of poor development.

The game is funny for all the wrong reasons and fun because of it.

I both love and hate this game all at the same time, but love it more than I hate it...

I just wish someone will make a cool retro Dinosaur game, maybe it will hapen one day... we can only hope.. Woo, old school archon fun.. The sad thing is, this 'template' (yes, not even a full game or even a demo - see in game menu start screen below title - not sure how they got pass it Steam) could have been a good game comaparable to the old 80's and 90's beat 'em ups like 'Double dragon', if it was COMPLETED. Very sad, not recommended, not even as part of bundle (the way I got it). If this game was air, it would be Los Angels on a smog filled working day. Avoid. 1/10. Waste of time.. This...this is what gunscape should have been ladies and gentlemen, You can't ♥♥♥♥♥ and moan when this just now started and is clearly going to be a user driven base of content. I just now got this editor up and i now have a base game to prototype my models and objects and ugre anyone trying to build a game themself to use this as a prototyper. To the developer i can only say once you have a guide to the

editor and more importing options this project can only grow.

(edit:) Side note: once a melee element is made this game will boom from the current love of the darkage books and the like given the effect on the world you can use. Swords at [dusk...in](#) a sand storm....epic..

To anyone under the age of 20: you will not like this and if your not skilled enough to make things of this sort you will not find it fun. This is a real full hearted throw back to the good old days of basics and the beauty there in. Go back to your HD-soaked ♥♥♥♥♥♥♥♥t FPS's kiddos.

Looking forward to the future of this game and hope that this review will bring in the few people who recall what made a good game and thats: Hard Work, Imagination, A drive to want something awesome!

fun game that teaches about basic computing and programming. Uh... Well... It's a fireworks simulator alright.... Played with the unofficial patch. The starting planet looks very alien, but after that it's just a generic desert spaceport with corrupt officials, a tropical planet with wolves etc. The writing is atrocious and the voice acting is Russian only (except for cutscenes with the unofficial patch).. Empty servers. Nothing to do... Maybe I'm just in the wrong timezone . . . pass... Hella good man. It's a very good game, online playing with friends, but any longer than 20 laps on the single player race, and get a bit boring with out tire and fuel simulation on. When I got this game I was like dang,one heck of a game!! :D
