The tool is web based and requires no download, no special software and no editing of any kind of documents. NOTE: This editor is still under development and some features are not yet supported, but we hope to include the ones that will be of most use to our customers. 1) Start the editor. Enter your License Number, User Name, Password and local URL at the top. 2) Select a version. a) Default version: b) 6.0 version: 3) Use the Browse button to select a file to load. You can browse to IATA Airport Air Waybill files, FWB, FHL, DGDs, and any other type of documents. 4) Click the Go button to preview the document and make any changes necessary. After clicking Go, the changes are saved in a file. If you want to edit a document, just right click it

and select Edit Document from the menu. 5) The document is converted to HTML. You can print this HTML document by using the Print button. 6) The HTML code is given at the bottom of the editor. You can easily edit the code with your preferred text editor. 7) Save the code to a file and load it in the editor. The editor will now re-print the document with the updated code. 8) To get the latest news and support, please visit our forums. I. Ticker Codes (The New Codes that will be used on FWB 6.0)

Trade – This is the original FWB trade code. It will be used on FWB 6.0. Use this code only if you need to enter a trade code at an airport that has been changed. MFI – This is the new FWB trade code that will replace the FWB trade code. Use this code only if you need to enter a trade code at an airport that has been changed. MFR – This is the new FWB manifest code that will replace the FWB manifest code. Use this code only if you need to enter a manifest at an airport that has been changed. MNL – This is the new FWB flight information label code that will replace the FWB flight information label code. Use this code only if you need to enter a flight information label at an airport that has been changed. MCL – This is the new FWB flight information label code that will replace the 82157476af
